

TOP 10 CONSIDERATIONS FOR CHOOSING THE RIGHT ID CARD PRINTER SOLUTION

With security concerns on the rise, organizations are facing the challenge of finding a reliable, scalable and cost-effective solution for producing secure ID cards on-demand. There's a wide spectrum of possible solutions from multiple providers, but how do you know which one will be right for you? Read on for our top ten things to consider as part of your evaluation process, so that you can narrow your selections and ultimately choose the right secure issuance solution for your needs.

SECURITY

Selecting a secure issuance solution that can support a broad range of credential security measures ensures that your investment is protected.

DURABILITY

Knowing how the card will be used and for how long can help you determine the level of durability you'll want to incorporate into your solution.

VOLUME

How many cards will you be printing? You'll want to be sure that you select a printer that was designed with your needs in mind.

FUNCTIONALITY

Do you wish to employ multiple simultaneous applications to your cards, such as encoding and lamination?

INTEROPERABILITY

Think about your ideal secure issuance solution holistically. What other ways might an ID badge be used in your organization?

CONNECTIVITY

Look for solutions that can support multiple connectivity options to give you the flexibility to print from any location.

The spectrum of available secure issuance solutions can seem overwhelming at first glance, but by understanding your technology options and taking these ten factors into consideration, you can start to narrow your selections. PARTNERING

It is important to consider the provider's longevity and innovation in the industry as these are good indicators of what you can expect.

QUALITY

Only consider those solutions that include full, multi-year warranties on printers and lifetime warranties on critical accessories.

MODULARITY

Solutions should be modular with the ability to add features that allow for technology migration or program expansion.

CONVENIENCE

Today's secure issuance solutions are quite sophisticated and as such make it easier and quicker to resolve any problems.
